

**AUTOMATED ACQUISITION OF VIDEO TEXTURES ACQUIRED FROM A
DIGITAL CAMERA FOR MAPPING TO AUDIO-DRIVEN DEFORMABLE
OBJECTS**

ABSTRACT OF THE DISCLOSURE

5 A technique for enhancing an audio-driven computer generated animation includes the step of mapping a video clip generated by a digital camera to an object displayed in the animation. Additionally, the object or the video clip can be deformed when selected events are detected during playback of the video clip.
